

By Twelve Bottles of PERUNA

Greatest Human Vitalizer

"During the winters of 1897 and 1898, I was so badly afflicted with catarrh of the head and throat that I must surely die from it. After trying many doctors and all other recommended remedies made known to me, I was induced to use Peruna. I was cured entirely by using twelve bottles of Peruna and one bottle of Manalin. Since that time, I have never been without Peruna. I use it for colds and as a general tonic during Spring and Fall months and find it the greatest human vitalizer."

F. M. HORTON.

DEMOCRATIC NOMINEE

for Ste. Genevieve County:
LEO D. KAIL.
for Representative.

REPUBLICAN NOMINEES

The Times is authorized to announce the following Republican nominees for office in Ste. Genevieve county, subject to the decision of the voters at the November election:

For Circuit Clerk:
J. A. KNOWLES.
For Justice of the Peace of Ste. Francois Township:
WM. GOOD
of Farmington.

REPUBLICAN NOMINEE

In Ste. Genevieve County:
WALTER C. DITCH
For County Clerk.

TOO BIG TO MISS

The average foreigner can rarely comprehend the geographical area of the United States, as was quite fully illustrated by the Englishman and his valet who had been traveling due west from Boston for five days. At the end of the fifth day master and servant were seated in the smoking car, and it was observed that the man was gazing steadily and thoughtfully out of the window. Finally his companion became curious.

"William," said he, "of what are you thinking?"
"I was just thinking, sir, about the discovery of America," replied the valet. "Columbus didn't do such a wonderful thing after all, when he found this country, did he now, sir? Hafter all's said an' done, 'ow could he help it?"

FARM FOR SALE

Seventy-five miles south of St. Louis on Missouri Pacific Ry. 55 acres or as much as 100 acres; good land, 5-room house, new barn, other good outbuildings, good water, young orchard, one mile from town with good high school; on rural route. Suitable stock or truck farm.
CHAS DISTEL,
35-41. Bismarck, Mo.

Willard SERVICE STATION

Why Batteries Wear Out

There are two reasons; the natural wear that goes on slowly, and the rapid wear that's due to abuse, as when you—

Spin-spin-spin—a cold motor
Let the plates starve for want of charge
Forget to add distilled water.

You expect natural wear in batteries as much as you do in tires—but if your tire was flat you wouldn't keep running on it.

Drive around this way, and we'll tell you how you've been treating that battery, and how you can postpone its old age.

Ask for our booklet, "A Mark with a Meaning for You"—it tells what's back of the Willard Mark.

FARMERS AND THE DRAFT

Washington, D. C., Sept. 16.—Under the rules of the War Department for executing the new draft law, special provision is made for informing the district boards in regard to farm-labor requirements in order that necessary food production may be maintained, says a statement issued by the Department of Agriculture. The statement continues:

In the new draft the district boards are charged with the duty of putting into deferred classes those persons who are more likely to further the war by remaining in civilian occupations than by entering the Army. Accordingly, three advisers are to be selected for each district board—one for agriculture, one for labor, and one for other occupations. The agricultural adviser will be appointed by the board upon the recommendation of the Secretary of Agriculture. The advisers are not members of the board but may, when invited, attend its meetings.

How Agricultural Adviser Will Aid
The duties of the Agricultural adviser will be to furnish to the board facts relative to farm-labor requirements, not only of his own district, but of the whole country. He should be the repository of all facts having relation to the deferment of agricultural workers, whether these be necessary farm laborers, managers or operators. He will be expected to advise the district boards as to a shortage or surplus of necessary farm workers for any given district, as well as for the entire Nation. Such information will be supplied to the advisers by the Department of Agriculture. This will make it possible to have necessary workers transferred from districts in which they may not be necessary to other districts in which they are sorely needed.

The adviser may also concern himself with individual cases that come before the district board. He will have the right, under certain conditions, to examine the questionnaires and other records in the files of the local board for the purpose of ascertaining whether persons entitled to deferred classification have actually claimed it. In case he finds the names of such registrants he may file for them a claim for deferred classification with the district board, which, in turn, may require the local board to certify the questionnaire and record of any such registrants for consideration. Reasonable time will be given for the purpose of obtaining information and supplying the affidavits required. If a local board determines to consider a case for deferred classification because a registrant is engaged in a necessary occupation, notwithstanding no claim for deferred classification on that ground has been made, it shall endorse the recommendation on the questionnaire of the registrant and forward it to the district board having jurisdiction. The district board will thereupon consider the case and proceed to classify the registrant, notwithstanding the fact that no claim for deferred classification by or in respect of the registrant has been made.

Claims in Behalf of Necessary Employees

A further duty with which the adviser is charged is to confer with employer of necessary farm workers, and to instruct them as to their right under the regulations to file a claim for deferred classification in respect of any registrant who has failed or refused to file a claim for deferred classification in his own behalf. This, in the opinion of the War Department, is a very important matter. The apparent injustice of placing many registrants in Class I is often due to the fact that employers have failed to make claims for deferred classification on behalf of necessary workers. It is to avoid a repetition of this trouble that farmers should see that all of their necessary employees, whether sons or other laborers, of the draft age have made for them just claims for deferred classification.

One important explanation is made in the new Selective Service Regulations in connection with the expression "skilled farm laborer." The questionnaire provides deferred classification for the "necessary skilled farm laborer in necessary agricultural enterprise." The new regulations provide that in Class II shall be placed any registrant found to be engaged in a "necessary" agricultural enterprise, and found to be necessary to such enterprise in the capacity of a farm laborer—"especially fitted for the work in which he is engaged." This quoted phrase constitutes an explanation of what is meant by "skilled" as applied to farm laborer. The expression will make easier the determination of the status of many registrants.

War Service in Right Place

The purpose in the appointing of advisers is to place men where they can do most to help win the war. These advisers will be able to help greatly the district boards to keep in agriculture the necessary workers. These workers, whatever may be their inclination to enter military service, should stand ready to serve in any capacity which they can contribute most toward a speedy ending of the war. In order that this may be done a frank statement should, in each case, be made to the boards. It is believed that it will frequently require as much courage on the part of many men to remain in their civilian occupations as to waive deferment.

This effort to keep men in industry, rather than to send them to the camps and the trenches, should not be abused so as to permit the slacker to escape military duty. The necessities for raising an army are paramount. Every man that can be spared will be needed and needed badly to bring the enemy to his senses. The adviser should be assisted in every possible way by every legitimate agricultural interest to find the men that can be spared for military duty, but also to keep those that are essential to the maintenance of a proper food supply.

Good for Biliousness

"Two years ago I suffered from frequent attacks of stomach trouble and biliousness. Seeing Chamberlain's Tablets advertised I concluded to try them. I improved rapidly."—Miss Emma Verbyke, Lima, Ohio. Obtainable everywhere. (adv.)

MISSOURI SOILS NEED LIME

Roughly estimated, half the cultivated soils on Missouri farms need "sweetening"—an application of ground limestone to neutralize soil acidity. With the exception of the loessal soils, or the Marshall silt loam, the Knox silt loam, and some of the lowland soils, Missouri soils are sour. If the farms of this State are to produce to full capacity, the acidity must be corrected.

There is such a great variation in the degree of acidity in soil samples sent to the University of Missouri College of Agriculture soils department for testing, that it is evident no specific amount of lime can be recommended. Each field should receive its own test and the ground limestone be applied accordingly. The average need in Missouri is from one and a half to three tons an acre. This need is affected somewhat by the state of fertility of the soil.

There is no better time to apply limestone than before planting wheat, spreading it on the plowed land and harrowing or disking it in. This is particularly true where land is to be sown to clover in the spring or alfalfa is to be seeded a year from now, inasmuch as it gives sufficient time for the lime to bring about the favorable chemical and physical conditions in the soil.

The price paid for ground limestone in Missouri will vary from \$1 to \$1.50 at the crusher. The cost of shipping, hauling and spreading will amount to about \$1.50 a ton, making the total cost about \$3.00 a ton. Based on present prices, a ton of limestone will return \$8 in increased crop yield if applied to the average Missouri soil lacking the constituent. The limestone should be ground fine enough to pass through a ten-mesh sieve. If coarser material is used, larger amounts will be required.

The correction of soil acidity is absolutely necessary for the growth of such crops as clover and alfalfa, but the fact that it will also greatly benefit the staple grain crops is being fast recognized. Clover and alfalfa, however, will surely fail on sour soil and since these crops, particularly clover, bear such an important relation to soil enrichment, the question of liming is of greatest importance. The value of clover as a soil improver may be judged from the fact that two tons of clover returned to the land increases the nitrogen supply of the soil 80 pounds, valued at \$32 if bought as nitrogen in commercial fertilizers at present prices.

Aside from the importance of lime in the soil to correct acidity, there are other benefits. It improves the texture and drainage of a soil, hastens the decomposition of organic matter in the soil, thereby rendering the inert nitrogen more available to plants, and assists in setting free the phosphorus and potassium in soil minerals.

Further information on the use of ground limestone may be had from the Soils Department, University of Missouri College of Agriculture.

Anyhow that Moscow Council is the meetingest organization we have noted in some time.

Now that another hospital ship has been torpedoed the Kaiser might send that long delayed telegram of exultation to the Kaiserine.

STOMACH TORN UP

Indiana Lady Describes Condition, Which She Says Was Due To Constipation and Tells of Relief Obtained From Black-Draught.

Scottsburg, Ind.—Mrs. Annie Johnson, of this place, writes: "I well remember I suffered for a long time with constipation, which would get me down. I took doctors' medicines and any number of purgatives. They would leave me in a worse condition than I was before taking, and my stomach so upset... I know once I suffered... from constipation, I was so ill we had to have the doctor, just so nervous and feverish. The doctor said I would have to quit medicines, my stomach was so bad... My husband was reading and found something about Theodor's Black-Draught and brought me a package to try. I used it regularly at first until I began to feel better, then I used just a dose occasionally. I was cured of this constipation and am sure the Black-Draught did it."

If your stomach is out of order, you will suffer from such disagreeable symptoms as 'eadache, biliousness, indigestion, etc., unless something is done, serious trouble may result. Theodor's Black-Draught has been found a valuable remedy for these troubles. It is purely vegetable, and acts in a prompt and natural way, helping to regulate the liver and to cleanse the bowels of impurities. Try Black-Draught. BB-15

Meanwhile we suppose the Sultan may be rewarding his Hun allies by conferring upon them the much coveted Order of the Turkish Bath.

The people of Murman (Russia) are sure to come over to the Allies. The Murmese women's party has declared against the Huns. Come on, Mermaids!
